Santa Claus Fuchsia *Fuchsia 'Santa Claus'*

Height: 3 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 9b

Description:

A bushy, mounded fuchsia variety that features bright red and white nodding flowers dangle from green bushy foliage; very attractive to hummingbirds; excellent for containers, hanging baskets, or window boxes

Ornamental Features

Santa Claus Fuchsia features dainty nodding white frilly flowers with red bracts at the ends of the branches from mid summer to early fall, which emerge from distinctive red flower buds. It has green evergreen foliage. The pointy leaves remain green throughout the winter.

Landscape Attributes

Santa Claus Fuchsia is a multi-stemmed evergreen shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting butterflies and hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Santa Claus Fuchsia is recommended for the following landscape applications;

- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Santa Claus Fuchsia will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 8 years.

This shrub does best in full sun to partial shade. You may want to keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Santa Claus Fuchsia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor containers and hanging baskets. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
